How To Safely Grow Richer from The Largest Consumer Boom In World History

How the unprecedented economic growth of 1.4 Billion people in China could

**Triple Your Money Safely In
The Next 2 years**

The economy in China is growing 4 times faster than the United States and they have a population 5 times larger.

This growth can lead today's smart early investors to extreme profits.

Dear Fellow Investor,

I know you've thought about how to best profit from the booming economy in China.

I'm G.H. Leong, editor of CHINA INVESTMENT LETTER. You may have read about me in *The Wall Street Journal* or other publications.

Over the years, more than 250,000 investors have relied on my publisher and I for powerful investment recommendations.

But I have never been more excited about an investment opportunity than this one!

Here's why ...

The opportunity for you to grow much richer is being created by the unprecedented economic growth of China.

You see, according to The World Bank, within five years, there will be 542 million new middle-class consumers in China with money to spend.

In fact, over the next 20 years, 72% of the growth in the world economy, in just about every product area, will come from China and the nearby region according to Gartner Research.

This consumer boom is creating the largest opportunity for wealth creation for you and me, ever, and it is upon us right now ...

Never before have so many people in the world advanced quicker. Their purchasing power could make the post-World War II consumer boom look pale in comparison.

Indeed, these 542 million of new middle-class consumers are about to change the world forever.

We've been studying and researching the investment opportunities in China for many years. We've traveled to

both countries extensively. We've developed contacts in the corporate, investment, banking and political arenas.

Our "local insights" can provide you with first-hand information no analyst or broker in New York could ever know. We can help grow your wealth many times faster than even the best China mutual funds.

I invite you to join me and multiply your wealth faster and with more safety than was ever possible before now.

Here's a preview of the 4 stocks we recommend highest right now. Each can be purchased by any U.S. broker and are totally liquid so you will have no trouble buying and selling.

Let's get started.

Our #1 Energy Stock for The China Boom

China is emerging as a powerful industrial economy. The demand for energy has really just begun. Over 80% of the country experiences energy outages, and there are still frequent brown outs in the major cities.

China's use of oil has been growing at an incredible 21% growth rate per year, and this will continue as far as the eye can see.

In this booming economy, they need an ever-growing supply of gas, oil and coal for factories, automobiles, manufacturing, housing and construction.

Bloomberg reports that China is the world's #2 energy user, and oil imports rose by 34% in the last two months compared to last year.

There's one energy company's stock that will benefit the most from this skyrocket demand.

It has a P/E of a reasonable 14. It pays a dividend of 1.93%. Its earnings grew by 22% last year, and analysts project 84% earnings growth this year and 24% annually for next five years!

It's rock-solid in all areas, and you can buy it right on the good old *New York Stock Exchange*.

Count on it to at least triple your money safely within the next 2 years, and I'm being very conservative in this estimate. I'll rush you full details on this stock in your free special report.

China's markets are growing so rapidly that it's not uncommon for our subscribers to make 100%, 200% even 300% profit or more in just three to six months. In fact, we've done this on 3 different stocks recently.

Our #1 Manufacturing Stock for The China Boom

This clothes manufacturer in China pays its workers an average of \$1.43 a hour.

It's no surprise it's gobbling up most of the world's clothes manufacturing business.

It's profits are rising 42% a year ...which is even faster than Microsoft in it's heyday ... which turned so many small investors into millionaires.

This is a blue-chip stock you can just buy and hold.

We expect you will make 5-times your money within 2 years ... and make 10-times your money within 4 years ... if you buy this stock now, before it's on everyone's "must-buy" list.

Compare that to your return from U.S. stocks and you see why I'm so excited.

I'll rush you full details -free- on this stock in your special report.

As you know, growth of an economy is what creates wealth for stockholders. And China's economic growth is more than triple the U.S.

This faster growth will provide investors with stocks that grow, on average, up to three times faster than U.S. stocks.

I know you're a smart investor, so I'm not surprised your portfolio contains international, Asia, or even China mutual funds.

That's a good start, and I applaud your vision.

But the handful of stocks we've discovered in China are much better investments. In fact, I'm confident they will grow our wealth an average of at least 40% a year.

At this rate, each \$5,000 you invest now will be worth \$144,627 in 10 years, \$777,840 in 15 years, and \$4.1 million in 20 years.

Yes, \$5,000 invested now would be worth over 4 million dollars in 20 years.

Let's look at it another way. Here's how much money you will have in 20 years if U.S. stocks grow 10% a year and our China stocks grow 40% a year:

Investment	In U.S. Stocks	In Our China Stocks
\$5,0000	\$33,638	\$4.1 million
\$25,000	\$336,370	\$41.0 million

It's no wonder Warren Buffett, Bill Gates, Peter Lynch, John Templeton and other legendary investors are putting more and more of their money into China stocks.

Our #1 Internet Stock for The China Boom

So far, only 8% of China's 1.3 Billion people are online and this company is gaining the vast majority of all new online customers!

It's similar to buying America Online (AOL) back when it was a new and fast-growing company in 1992. Adjusting for splits, it's shares zoomed from \$1.12 to \$58.50 in just the next 8 years.

This turned each \$3,000 into \$156,696 and we think

this stock will gain you similar jaw-dropping profits.

You see, their search engine provides relevant Chinese-language results. This is a huge competitive advantage because there are 37 different ways just to say "I" in China.

That's why it's beating the pants off Google. And this will continue - or Google will buy this company. Either way, you'll make a huge profit.

You'll be banging your head against the wall for the rest of your life if you don't jump on this very soon. I'll rush you full details on this stock in your special report, yours free.

Our #1 Cell Phone Stock for The China Boom

This company in China is gaining over 4 million new customers every single month. These are paying, high-profit customers.

We predict it's \$6 stock will rise to \$14 in 1 year and to \$20 or more within 2 years.

This opportunity is similar to Microsoft back when it was a new, fast-growing company. It's stock turned \$5,000 in 1986 to \$1.8 million in 1998.

We think this stock in China could make you these same type of profits if you get in now while it's still early.

In addition to its 36% annual growth in cell phone customers, this company has developed nearly 300 industry-specific application products and functions.

The torrid growth of China's economy, the drive to an "information society", and the modernization of rural areas will provide ample room for decades of similar growth. Full details in your special report ... yours free.

There's also a tiny little company that just signed a big joint-venture partnership with the wireless 800-pound gorilla, Qualcomm. Current share price is under \$1. Full details in your newsletter.

China has 380 million cell phone users with 142,000 new cell phone users being added every single day.

Yes, China is already the largest cell phone market in the world.

These 4 stocks can upgrade your wealth, retirement and inheritance to your children and grandchildren to a whole new level.

CHINA INVESTMENT LETTER is our premium monthly newsletter. In it, we reveal the best companies that are becoming industry leaders in China.

When you combine the size of the market in China, the fast rate of economic growth, the leadership of the companies we recommend, this is an unbeatable combination to build riches on a grand scale.

These are stocks that your U.S. broker has never even heard about in almost every case. Yet they are oozing with more profit potential more so than any other investment I know of.

You cannot afford to wait. Your biggest risk is not being invested in these exceptional China stocks.

Our Track Record of investing in China stocks is excellent.

In 2006 alone, 94% of our recommendations have been profitable:

Stock Recommended	Performance in 2006
Baidu	- 2.5%

Sales Letter Headline Test B

The next Microsoft Of China

This company in China

is gaining

4 million new customers every single month

We're confident this \$6 stock will rise to \$14 in 1 year and \$20 or more within 2 years.

This opportunity is similar to Microsoft back when it was a new, fast-growing company. It's stock turned \$5,000 into \$1.8 million.

We think this stock in China could make you these same type of profits if you get in now while it's still early
