

Obscene Profits

Dear Profit Confidential Reader:

This \$11 stock is now positioned to rise to \$55 within the next two years – 5 times your money!

In all my years as a market insider, I have never seen a stock so perfectly positioned as this one. In fact, I'm very confident it will make you 5 times your money.

How do I know? Here are the facts on this \$11 stock:

---This company is holding \$232 million in cash, with no debt.

---Its annual sales have gone from \$61 million in 2000 to over \$200 million this year... a 228% increase! More importantly, the company's cash cost to produce its only product has fallen from \$207 per unit in 2000 to only \$98 today!

And I expect demand for this company's product to skyrocket over the next couple of years.

That puts this \$11 stock at \$55 to \$77 within two years from today.

Every \$5,500 invested could give you \$27,500 fast—with very low risk!

P.S. 99% of what you read about investing (or hear on TV) is pure garbage. Successful investing, as defined by the media today, is all about buying mutual funds and sitting on them. I think nothing could be further from the truth. Buying mutual funds and sitting tight will never bring you the home runs you need to establish your permanent financial security.

For that, you need to step into a different stadium... a place where big profits are the norm. And that's why I'm urging you to click this link now: <http://www.lombardipublishing.com/ads/OP>
