Your pain is caused by **BOTH** your joints and this previously overlooked factor, as published in *The National Review of Rheumatology*.

Clinical study shows when this overlooked factor is left untreated (as it is **NOW** for YOU by today's pain relievers), there is a seven fold increase (700%) in cartilage loss.

Doctors and Drug Companies Were Wrong Again!

The Natural Discovery that Can End Your Pain with No Drugs, Surgery or Doctor Visits

Before this recent discovery, doctors thought pain was **ONLY** caused by deterioration of your joints (which led to cartilage loss.)

New research proves your pain is caused by BOTH your joints AND your bones.

I'll give you all the medical proof in a moment, but first, I want to start with "common sense proof" that your pain is caused by **BOTH** your

joints and your bones.

Think about **ONE part of your body** that is often painful. It could be your knee, shoulder, elbow, fingers or back.

When you look at this pain area, what body part do you think about? First, you think about the bones in that area, then you think about the joint in that area. So you think "bone" then "joint".

We are finally PAIN-FREE because of this...

Yet the pain relief industry thinks **ONLY** about **ONE** of these **TWO** body parts which is your joints.

No wonder you still suffer from pain now!

The new research that shocked the medical industry is this: There is no such thing as joint pain, because it is really bone-AND-joint-pain.

You can't fix a problem if you only treat **HALF** of it. But that's what **YOU** are doing **NOW** by taking today's pain relief prescription drugs, over-the-counter pain relievers and natural pain relief supplements.

I predict we will soon look back and **LAUGH** how **DUMB** it was that we didn't treat pain this way!

Your bones and joints are really **ONE CONNECTED UNIT** that work together, as you can see from the illustration below.

Today's pain-relief supplements and prescription drugs **ONLY** treat your joints, which is just **HALF** the cause of your pain.

If you want to end your pain, ignoring your bone health is like ignoring your batting stance if you are hitting a baseball, or ignoring your alignment if you are a golfer, or ignoring your soil if you are a gardener.

(continued)

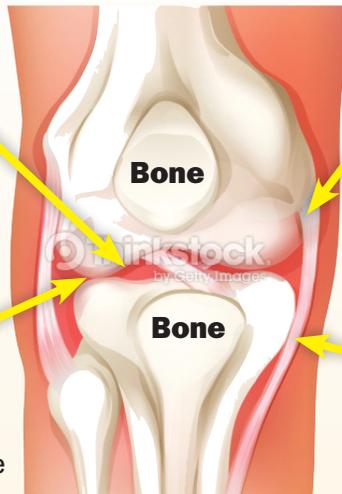

Your Bones and Joints Work Together as One Connected Unit

Capsule

Surrounding the joint is a tough, fibrous sleeve (the capsule) that stops the bones from moving too much. The inner surface of the joint capsule (synovium) produces a thick fluid

Cartilage

The ends of the bones are covered in a thin layer of cartilage. This cushions the joint and helps to spread the load evenly when you put pressure on it. Its smooth, slippery surface

Muscle

At either side of the joint, the muscles are attached to the bones by tendons. As the muscles contract, they pull on the bones to make the joint bend, straighten or rotate.

Ligament

Within or just outside the joint capsule are ligaments that help to hold the joint together and prevent it dislocating. The bursa helps to reduce friction in the joint.

The Real Root Cause of Pain is Now Proven to Be Both Your Joints AND Your Bones—

And You Must Treat BOTH if You Want Much Better Pain Relief

This ground breaking new fact of “the weakened bone-and-joint-cause of pain” has proven pain originates from your subchondral bone. It is your bone, not your joint, that absorbs most of the impact from contact and movement dozens of times every day.

Your bones move every time your body moves in any way. This wear and tear overloads your bones. This leads to micro-fractures in subchondral bones underlying your joint cartilage.

As you age, your bones become weaker. They become

too weak to cushion your joints, so you suffer from pain in these areas.

A lot of people think its something else, when in reality **the pain is starting from YOUR BONES** and until you make your bones healthier, **NOTHING ELSE** will help end the source of your pain!!!

“Why has this key source of pain been so overlooked and neglected?” You Ask.

Modern medicine concentrates on the more “sexy” parts of the body like the joints, instead of the bread-and-butter core structure part which is your bones.

There’s not much money in bone health, which is why some leading alternative doctors think it is not well studied or treated.

One insider told me if a person is diagnosed with arthritis, they can spend over \$100,000.00 with the healthcare system over their lifetime on

doctor visits, tests, surgery and drugs, but if this same person is diagnosed with a bone problem, they may only spend a few thousand dollars or less.

Bone health is like the unwanted stepchild—nobody knows much about it, nobody thinks much about it, and nobody wants to deal with it.

If you want to get rid of your pain, ignoring your bone health is like ignoring your batting

stance if you are hitting a baseball, or ignoring your alignment if you are a golfer, or ignoring your soil if you are a gardener.

Here's the great news:

You don't have to suffer from pain anymore! In a moment, I'll tell you about an all-natural way to alleviate your pain by treating BOTH your joints and your bone with the all-natural supplement, **CalciJoint**.

“I Used to Cry Every Day Because of My Pain, But Here's How I Became Pain-Free”

Dear Friend,

If you're like me, you want no more pain so you can live a better and happier life and do the things you want without any pain.

Before this discovery, I couldn't even stay asleep at night because my shoulder and back pain was so bad.

I couldn't walk to the mailbox easy because of my knee pain. But worst of all, **I could not even pick up my precious 9-month-old granddaughter because of my elbow pain.** This broke my heart and caused me to cry every single day.

I was tired and depressed most of the time because of my terrible pain.

I tried everything under the sun to fix my pain ... but nothing worked good enough, or stopped working, or had terrible side effects.

My friend Stephanie heard about a new way to treat pain on the TV news, and she told me about it, I called to order the product and it changed my life. **Finally I found something that ended my pain!** I cannot recommend highly enough that you try **CalciJoint**.

Sincerely Yours,
Angela Thomas

How Two Frustrated Rebel Doctors Made This Startling Discovery

When you get out of pain, you should thank Dr. David Burr and Dr. Maxime Gallant from the Indiana University School of Medicine in Indianapolis, Indiana.

For decades, they had been frustrated by the lack of effectiveness for today's pain relievers like prescription narcotics and over-the-counter pain relievers.

These 2 rebel genius doctors knew something was wrong with conventional pain theory and treatment because so few people got complete pain relief. So they kept questioning and doing research and clinical trials.

Before them, doctors and the big drug companies thought pain was caused **ONLY** by age-related joint degeneration. But their new studies demonstrate it is caused by early loss of bone and reduced bone density. This is followed by loss of cartilage.

Caption here and here and here that talks about bone loss and joint degeneration.

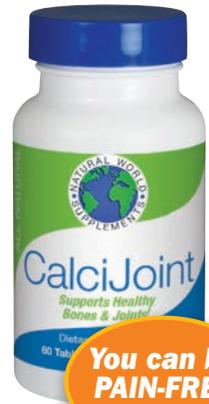

New research proves bone changes occur earlier than cartilage deterioration.

As you age, your bones become weaker and not strong enough to cushion your joints, so you suffer from pain in these areas.

Announcing CalciJoint

the first-ever-of-its-kind natural supplement that treats BOTH causes of your pain, and NOT just ONE like today's pain relievers do.

Amazingly, it has proven so effective, you can try it **FREE** of any risk, and your pain relief is guaranteed or it will be yours **FREE** plus you will also receive extra cash back just for trying it.

I am very excited to send you this supplement because it is **NEW** and **COMPLETELY DIFFERENT** from anything else you have ever tried for pain relief. That's right. It is **NOT LIKE ANYTHING ELSE**.

The first of 4 all-natural ingredients in this all-natural "pain vanisher" is a unique type of special calcium. It not only provides a highly concentrated source of calcium, but also provides relevant levels of other trace minerals neces-

sary for bone health including strontium, magnesium, zinc and copper.

This is crucial: the public is not aware that all types of calcium DO NOT work the same. The type of calcium determines whether your body absorbs and utilizes the calcium it needs... or it does NOT.

Much of the calcium sold in the marketplace today is either mined or is chemically produced from mined calcium carbonate. These calcium products are poorly absorbed and they have the potential to cause digestive problems such as constipation, nausea, and bloating.

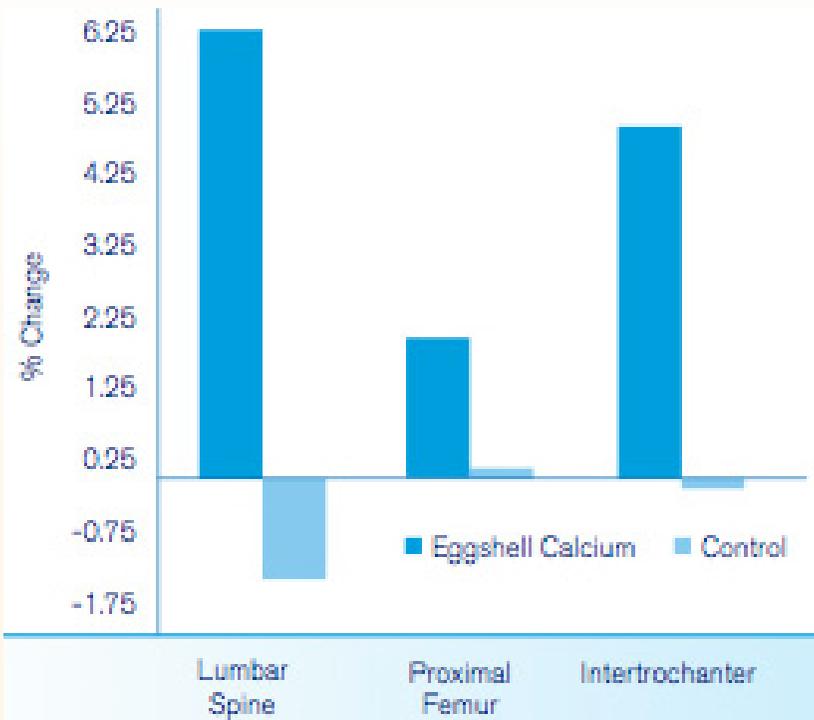

Caption here and here and here that talks about calcium and digestive problems.

What's worse, studies have also found much calcium is contaminated with heavy metals, such as lead, mercury

(continued)

Change in Bone Mineral Density from Eggshell Calcium in Eight Months

and arsenic. Ours is 50-times lower in heavy metal content than the strict California Proposition 65 limits.

The next ingredient is the amazing **Vitamin K2** (as Menaquinone-7). You need this because bone is a living substance comprised of a hard outer shell and spongy inner tissue matrix. This protein binds calcium to the bone matrix and builds healthy bones... so you don't suffer from pain.

Populations that consume a significant amount of natural vitamin K2 have stronger, healthier bones. Unfortunately, the American diet does not contain sufficient vitamin K2 and the majority of healthy people are therefore vitamin K2 deficient.

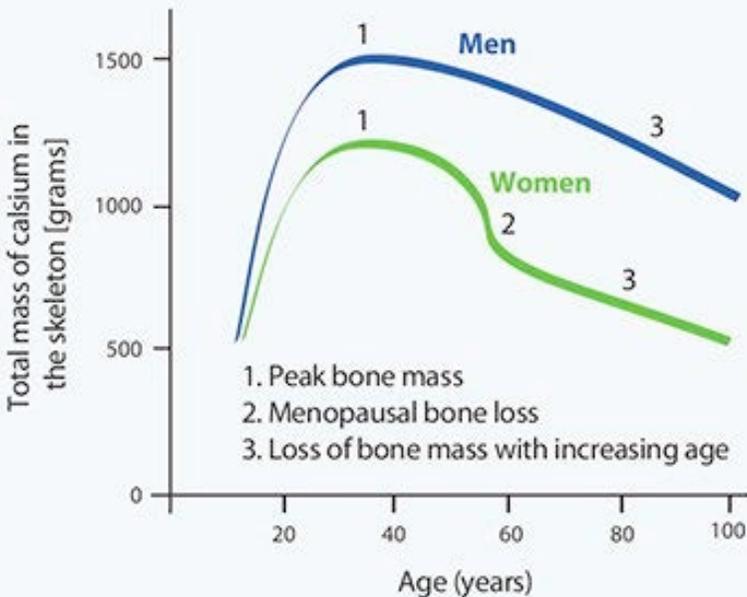

“This **NEW** all-natural discovery reverses **BOTH** causes of even the worst bone-on-bone pain in your knees, hips, back, wrist, elbow, ankle, fingers, shoulder and other joints.”

The next ingredient, **Turmeric extract**, has been used for over 2,400 years in India by healers to help people get rid of pain.

Recently, science has started to back up what Indians have known for a long time... it really does contain compounds with medicinal properties. These compounds are called

Headline for Chart Can Go Here and More of the Headline Can Go Here

curcuminoids, the most important of which is curcumin.

Curcumin is the main active ingredient in turmeric.

It is a very powerful natural anti-inflammatory compound. It is SO powerful that it matches the effectiveness of some anti-inflammatory drugs... except without the side effects.

Curcumin actually targets multiple steps in the inflammatory pathway, at the molecular level. Curcumin blocks NF-kB, a molecule that travels into the nuclei of cells and turns on genes related to inflammation.

Here's More Iron-Clad Proof for this "Double Cause" of Pain — (And How to Get *Much Better* Pain Relief Now)

Before this recent discovery, doctors thought pain was **ONLY** caused by deterioration of your joints, which caused loss of cartilage. But stunning new research by two frustrated rebel doctors gives overwhelming proof the **REAL** cause of pain is **ALSO** your bones. Your pain is caused by **BOTH** your joints and your bones, as published in *The National Review of Rheumatology*.

MORE PROOF: Both the Chingford and the Framingham studies report that in all joints, there are holes in subchondral bone that provide pathways of communication between the subchondral bone and cartilage.

MORE PROOF: There is a seven fold increase (700%) in

cartilage loss in regions with subchondral bone attrition.

MORE PROOF:

Researchers have found changes in subchondral bone mineralization and volume occur **ONLY** beneath the areas of significant cartilage destruction. The increased rates of bone remodeling causes alterations in joint shape that cause progressive cartilage loss.

Do you want the best pain relief? Then try **CalciJoint**... the first-ever-of-its-kind natural supplement that treats **BOTH** the causes of your pain. It has proven so effective, you can try it **FREE** of any risk, and your pain relief is guaranteed or it will cost you nothing.

Medicine Journal published double-blind, placebo controlled study results. 107 patients with severe knee pain were tested at a university hospital, and patients who took a tumeric/curcumin extract got as much pain relief as patients who took 800mg of Ibuprofen!

Finally, this supplement contains Vitamin D3 because researchers at Japan University in Tokyo studied a combination of vitamin D3 and calcium. It improved bone mineral density, and did so without significantly increasing blood calcium levels.

**This Is NOT Just
“A Women’s Problem”—
Men’s Journal Reports
MEN OVER 50 Have a
27% Better Chance
of Getting This than
Prostate Cancer!**

In the new *Men’s Journal*, editors report a study showing males over 50 have a 27% better chance of breaking a bone than getting prostate cancer.

Before now, bone health was considered by many as a “womens disease”, but a new report from the *International Osteoporosis Foundation* reveals that men over 50 are 27% more likely to break a bone due to osteoporosis than get prostate cancer.

Experts say there’s a clear explanation: Guys haven’t gotten the message that they need to take steps to strengthen bones, and the natural supplement CalciJoint does this for men.

**The Link Between Brittle
Bones and Hardened
Arteries, Fatigue,
Digestive Problems and
Lowered Immunity**

A UCLA School of Medicine clinical study showed people with weak bones had a much higher rate of life-threatening hardening of the arteries.

The researchers said this bone-caused problem is created because calcium solidifies in the arteries of the heart, instead of in the bones.

Heart attacks, strokes and other heart-artery problems are caused by the reduced blood flow this causes.

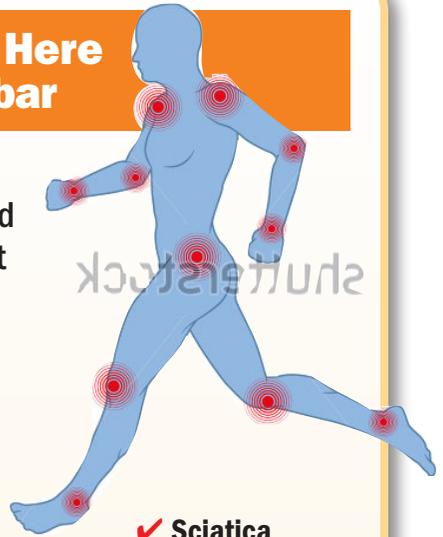

Dr. Nicholas Perricone, M.D. says it is no coincidence that **with aging, less bone strength is accompanied by lower energy, more digestive problems and many illnesses from a lowered immune system.**

WARNING

Do NOT Take Any Pain Reliever Until You Read This!

DANGERS of OTC and prescription pain relievers!

Here is a scandal that I must expose...

Many studies prove over-the-counter pain reliever NSAIDS (Tylenol, Aspirin, Advil, Motrin, Celebrex, Naproxen and others) can cause stomach ulcers, diarrhea, internal bleeding and liver damage!

HARVARD HEALTH newsletter confirmed arthritis patients experienced hip joint destruction from taking high doses of a medication.

Any good doctor will admit the fact **these pain relievers do nothing to heal the damage that is causing your pain.** This means the underlying damage that's causing your pain only grows **WORSE** with time.

Pain meds actually degrade and aggravate the bone, joint and cartilage problems over time. They also **STOP** your body's own pain-killing enzymes from activating to heal the pain!

(continued)

Steven Sinatra, M.D., proclaims “Most MD’s now realize that all conventional painkillers, arthritis drugs and NSAIDs (including aspirin) BLOCK your body’s natural ability to heal the root cause of pain.”

Pain meds can give you high blood pressure (which can be deadly).

They can rot your gut—eat away the lining of your stomach. They damage the gastrointestinal tract. They slow down the liver.

Look: If you ignore this

all-natural breakthrough, don’t be surprised if you suffer from heart problems from high blood pressure, ulcers, core damage to the joints, cartilage and tissue requiring surgery.
