Read the brief letter below to see how you can receive
INSTANT ACCESS to this (as well as two other
Research Reports) totally free of charge:

Keep reading to find out how you can get
instant access to this free Forex Trading
System report ...

Dear Fellow Trader,

Look – winning traders tell me this FOREX trade is better than anything they've
seen because:

- 1 – it does NOT “lag” like almost all others; it is based on PRICE
- 2 – it only catches the BIG MOVES; it may only tell you to make 1 trade per week
- 3 – it uses my own propriety (and soon patented) system of entry, exit and even
stop-loss
- 4 - it's a set-it-and-forget-it trade; you can place the trade at night and sell in the
morning with no day trading needed

This is a proven winner ...

In addition to the 142 PIPS in 1 day, it has also made

**79 PIPS in 1 day and 93 PIPS in 1 day ... all in the
past two months alone!**

Frankly, with this formula plus the free offer I'm making, I think you are "brain dead" if you don't jump on this now.

Onward.

This trading pattern is called Currency Breakout Formula, and it very accurately predicts breakouts in the FOREX market days before they actually happen.

How? I have my favorite lagging indicators also, but this pattern uses actual real-time price movement (which is not lagging), and then it uses lagging indicators to confirm what the market has already told me.

You see, I get all the information I need by watching the pairs themselves move. Yes! The current price action shows me where there is a very high probability for the next breakout, and which direction that breakout will occur.

These breakout days can hold monster moves with great momentum ... which translates into large profits for the savvy traders who know this formula.

No, I don't have a crystal ball and I can't guarantee you easy overnight riches – that's B.S. and you should run from anyone who claims these things. But I can show you this chart pattern that I discovered. It is so flat-out accurate at predicting major breakouts days before they occur ... you'll feel like you're cheating.

It uses the complex interaction of 42 different patterns, but for you, the beauty of the Currency Breakout Formula is its simplicity, ease of use and lack of anxiety:

No more analyzing charts for hours on end to find the "perfect pattern" ...

No more jumping into big breakouts at the last minute (when it's too late and all the profits have already been realized), and ...

No more guessing on when you need to exit out of the trade.

You can have this "secret pattern" via instant download 5 minutes from right now. Once you do, you'll finally be able to trade with full confidence, enjoy it more, and see real large gains in your account.

I explain this remarkable trading strategy in a special report, **Currency Breakout Formula: How To Predict Breakouts In the Forex Market Days Before They**

Actually Occur. And when you sign up to receive my **Mega Market Movers** report, I will send it to you by email right now ...

ABSOLUTELY FREE!

These Forex currency breakouts create a FEEDING FRENZY for traders who want in on the action.

If you're on the right side of these "mega moves", and you can be, the profit potential is HUGE. But if you are on the wrong side, it could take you months (or even years) to recover. What would happen to YOUR account if you bet the wrong way on our 142, 79 and 93 PIP moves? Don't risk losing that much when you don't have to!

The next trading opportunity is coming up very soon. If you want to be ready to act on it, you need to reply now. I'll let you access this report INSTANTLY (plus have a hard copy delivered to your door) totally free of charge ...

OK now. Here are 3 charts showing the My System moves of 142, 79 and 93 PIPS in less than a day each:
